

Asian Longhorned Beetle (ALB) Identification Card

BEETLE BUSTERS

Countdown to **ERADICATION**

1. Search for the ALB

It has:

- A shiny black body
- White spots
- Long black-and-white antennae

2. Report Your Findings

– whether or not you see an ALB!

**Search . . .
Report . . .
Be a Beetle Buster!**

Report at <http://beetlebusters.aphis.usda.gov> or by calling 312-742-3385.

When To Look

The Asian longhorned beetle is active from late spring through fall.

Where To Look

The ALB destroys elm, horsechestnut, maple, willow, and other hardwood trees.

On Trees:

- Look for the ALB itself.
- Look for the evidence:
 - Round scars on tree bark
 - Dime-sized exit holes
 - Sawdust and sap
 - Yellowing or drooping leaves

In Surrounding Areas:

- Watch for ALBs on:
 - Benches
 - Lampposts
 - Cars
 - And more!

Remember To Report Your Findings — *whether or not you see an ALB!*
